

## Your Choice for QMS Solutions

Company specialized in Quality Management System (QMS) activities in the aerospace sector.

# Who We Are

AOCS was born from the partnership between engineers Giuseppe Tortora and Francesco Cirillo, both experts in the aerospace sector:

**Giuseppe Tortora:** President of the technical committee, with over forty years of experience as a Program Manager at ENAC and a member of the EASA Certification Team. His expertise is a cornerstone in the aerospace industry.

**Francesco Cirillo:** CEO, with over twenty years of experience in QMS Management in companies certified according to the AS9100 standard. He has collaborated with prestigious clients such as BOEING, AIRBUS, and BOMBARDIER.

AOCS also benefits from a team of professionals from the aerospace sector, operating in international contexts.

# A New Beginning in 2024

AOCS was founded in 2024, integrating the expertise and experience of a team from entities operating in international contexts in both the Aerospace and certification sectors.

# Our Mission

Our mission is to provide tailor-made, high-quality solutions to meet the specific needs of our clients in the aerospace sector. Leveraging the experiences and expertise of our collaborators, we support organizations in obtaining and maintaining valid certifications and managerial roles across various domains.

# I Nostri Servizi

- **Implementation of Quality Management Systems and Production Management Systems:**  
Support to obtain ISO 9001, ISO 9100, and ISO 14000 certifications.  
Preparation and implementation of control procedures and manuals according to the regulations required by the certification authorities.
- **Service in Quality Management:**  
Provision of Quality Manager service for ISO 9001, ISO 9100, DOA, and POA certifications.
- **Preparation and Implementation of Control Procedures and Manuals for Certifications of Production and Design Organizations:**  
We prepare procedures and manuals according to the regulations required by the aviation authorities.
- **Third-Party Audits:**  
Audits to ensure compliance with industry regulations and standards.

- **Service in Safety Management:**

Provision of professional figures for companies certified according to EASA standards to ensure safety and compliance with regulations.

- **Training Courses:**

Courses provided by aviation authorities to keep staff up-to-date on industry regulations and best practices.

- **FAIR/FAI and Dimensional Controls:**

We use advanced technologies such as the Laser and the Anthropomorphic Arm to ensure the accuracy and compliance of your products with the required specifications.

- **Design and Execution of Tests, Controls and Inspections on Materials and Goods:**

We offer comprehensive services to assess the quality and reliability of materials and goods through testing, inspections and inspections.

- **Preparation and Implementation of Procedures and Manuals for Environmental and Safety Certifications:**

We are experts in creating and implementing procedures and manuals that meet the requirements of environmental and safety certifications.

- **Expert activities for aircraft and parts for the purpose of issuing bank guarantees and legal valuations.**

### **1. Technical Inspections:**

- **Mechanical Condition:** Verification of the maintenance status of the aircraft and its components.
- **Regulatory Compliance:** Ensuring that the aircraft meets civil aviation regulations.
- **Maintenance Records:** Review of maintenance logs to ensure all necessary procedures have been performed.

### **2. Economic Evaluations:**

- **Market Value:** Determination of the market value of the aircraft and its components.
- **Depreciation:** Calculation of depreciation based on the age, usage, and condition of the aircraft.

### **3. Document Analysis:**

- **Ownership Documents:** Verification of ownership titles and the aircraft's ownership history.
- **Airworthiness Certificates:** Inspection of certificates that confirm the aircraft's fitness for flight
